Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant agreed to correct the 112 rejection of claim 27. With regard to claim 44, examiner clarified rejection involving binder in prior art as non-dispersible. US '886 teaches a sodium silicate binder which is non-dispersible. With regard to claim 57, examiner restated concentrations of binder in prior art. Applicant argued that US '401 would have much lower amount of bentonite binder than claimed since it is a compressibility enhancer, although no concentration was specifically disclosed. No agreement was reached.
